Secretariat Office

Undersecretary

Serves as the designated Secretariat representative for two (2) assigned technology departments within the organization, ensuring efficient administrative coordination and accurate documentation of departmental activities. Working under the supervision of the Executive Secretary, the Undersecretaries manage the documentation requirements, records, and communication for their assigned departments while upholding the standards and policies of the Secretariat Office.

Finance Office

Bookkeeper

Responsible for handling and tracking the financial records of the organization. Organizes cash and digital receipts and maintains up-to-date ledgers. Verifies the list to ensure the accuracy of every data entry.

Auditor

The sole independent reviewer of the financial records of the organization. Verifies the accuracy of financial records, operations, and compliance within an organization.

Relations Office

Internal Relations Lead

Fosters communication and partnerships with the local community partners within Pamantasan ng Lungsod ng Maynila. This includes creating and managing Memorandum of Understanding and Memorandum of Agreement with local community partners. They shall also coordinate with other departments in disseminating partnership plans.

Relations Office

External Relations Lead

Fosters communication and partnerships with external partners and other cloud clubs, public relations, and outside university partnerships. This includes creating and managing Memorandum of Understanding and Memorandum of Agreement with local community partners. They shall also coordinate with other departments in disseminating partnership plans.

Operations Office

Events Lead

Responsible for planning and managing the organization's events and activities. They make sure that each event runs smoothly by coordinating with different teams, creating schedules, assigning tasks, and solving problems that may come up before, during, and after the event.

Operations Office

Logistics Lead

Responsible for making sure all event needs are ready and organized. They handle the venue setup, equipment, materials, transportation, and manpower to ensure everything is in place for the event to run smoothly. They also work closely with the finance team to manage the purchasing and budget needs of events by preparing requests for materials, keeping track of expenses, coordinating with suppliers, and ensuring that all purchases and financial records are complete and organized.

Operations Office

Technical Lead

Responsible for all technical needs during events. They manage the sound system, lights, projectors, presentations, and online platforms when needed. They also test the equipment before the event and quickly fix any technical problems to help the program run without interruptions.

Creatives Office

Documentation Lead

Priority is to capture highlights of AWS Student Builder Group - Haribon's events and milestones. This covers photography, videography and other types of documentation methods. Must be knowledgeable and skilled in handling a camera to produce professional output that showcases the AWS Student Builder Group - Haribon's events and achievements.

Creatives Office

Graphic Design Lead

Responsible for the creation of attention getter promotional materials that showcase the identity and vision of AWS Student Builder Group - Haribon. This role brings ideas into designs that capture attention, communicate messages effectively and maintain branding across all platforms.

Marketing Office

Social Media Lead

Oversees the organization's digital marketing strategy and ensures content reaches the right audience at the right time.

Content & Copywriting Lead

Ensures every published material communicates the organization's message clearly, professionally, and consistently.

Marketing Office

Video Content Lead

Conceptualizes engaging video-first campaigns that support the organization's marketing objectives.

Technology Office

AI / ML Lead

Leads in developing programs that strengthen members' understanding of artificial intelligence, machine learning, and data science. Oversees workshops on model training, deployment, prompt engineering, and the ethical use of AI in academics, daily life, and professional work, with exposure to AWS AI/ML services. Equips members with the skills and mindset to harness the latest AI technologies responsibly for solving real-world problems.

Technology Office

Automation Lead

Heads the Automation Skill Builder, designing programs that introduce members to workflow automation, scripting, and process optimization. Organizes hands-on sessions covering automation tools, cloud-based triggers, and AWS services that streamline repetitive tasks and improve operational efficiency. Guides members in applying automation thinking to real-world scenarios, helping them build solutions that save time and reduce manual effort.

Technology Office

Cloud and Infrastructure Lead

Takes the initiative in introducing members to the fundamentals and possibilities of cloud technology, especially AWS and its core services. Designs programs and activities that make complex topics like systems administration, scalable infrastructure, and AWS-based solutions approachable and engaging. Guides members through hands-on workshops and projects that build confidence and practical skills in navigating the cloud.

Technology Office

Cybersecurity Lead

Directs in creating initiatives that teach members threat analysis, security best practices, and ethical hacking techniques. Plans and supervises security drills, workshops, and awareness campaigns that cover essential principles to protect privacy, avoid common hacking risks, and apply AWS security services. Guides members in understanding both the security of the cloud and security in the cloud, ensuring they gain both theoretical knowledge and practical defensive and offensive skills.

Technology Office

Data Engineering Lead

Manages the Data Engineering Department, designing learning pathways and projects that build members' expertise in data pipelines, ETL processes, and database management. Facilitates workshops on SQL, data modeling, and AWS-based data tools, emphasizing that well-structured, cleaned data is the foundation of accurate analysis and decision-making. Oversees the creation of real-world datasets and analytics challenges for applied learning.

Technology Office

Game Development Lead

Heads the Game Development Skill Builder, fostering creativity and technical proficiency in interactive media design. Organizes sessions on game mechanics, storytelling, and graphics programming. Guides members in building playable prototypes and collaborative game projects.

Technology Office

Iot and Robotics Lead

Manages the IoT and Robotics Skill Builder, creating opportunities for members to design, program, and deploy connected devices and robotic systems. Plans hands-on builds, competitions, and integration projects that leverage AWS IoT services for device connectivity, data processing, and automation. Promotes innovation through real-world applications of IoT and robotics technologies both in the cloud and at the edge.

Technology Office

Project Management Lead

Manages the IoT and Robotics Skill Builder, creating opportunities for members to design, program, and deploy connected devices and robotic systems. Plans hands-on builds, competitions, and integration projects that leverage AWS IoT services for device connectivity, data processing, and automation. Promotes innovation through real-world applications of IoT and robotics technologies both in the cloud and at the edge.

Technology Office

Software Engineering Lead

Heads the Software Engineering Department, developing initiatives that enhance members' coding, application design, and software architecture skills. Organizes collaborative projects, coding challenges, and mentorship opportunities that incorporate AWS developer tools and cloud-native application frameworks. Guides the team in adopting efficient workflows and modern programming practices.

Technology Office

UI / UX Lead

Heads the UI/UX Design Skill Builder, focusing on developing members' skills in user interface design, user experience strategy, and accessibility standards. Organizes workshops on design tools such as Figma, Flutter, and other UI/UX development tools.

Technology Office

AI / ML Mentor

Brings hands-on experience in AI, machine learning, and data science to support the Lead's planning and decision-making. Offers a sounding board for ideas around model training, deployment, and prompt engineering, helping ensure workshops stay both technically sound and grounded in responsible AI practices.

Technology Office

Automation Mentor

Provides the Lead with grounded perspective on building and running automation programs, drawing from experience with workflow design and process optimization. Helps think through session structures involving automation tools and AWS-based triggers, offering input that keeps the program practical, relevant, and accessible to members at varying skill levels.

Technology Office

Cloud and Infrastructure Mentor

Lends practical know-how on AWS and core cloud concepts to help the Lead shape effective programs. Steps in when systems administration, scalable infrastructure, or AWS-based solutions get tricky, offering perspective that smooths out the learning curve for both the Lead and the members.

Technology Office

Cybersecurity Mentor

Shares accumulated knowledge of security drills, workshops, and awareness campaigns to strengthen the Lead's planning. Acts as a resource on threat analysis and ethical hacking approaches, helping the team stay sharp on both the security of the cloud and security in the cloud.

Technology Office

Data Engineering Mentor

Provides a steady reference point for the Lead when designing learning pathways involving data pipelines, ETL processes, and database management. Helps troubleshoot workshop content on SQL, data modeling, and AWS-based tools, keeping the department's focus on clean, well-structured data.

Technology Office

Game Development Mentor

Draws on past experience in interactive media design to give the Lead a steady hand when planning sessions on game mechanics, storytelling, and graphics programming. Helps refine ideas for playable prototypes and collaborative projects, keeping creativity and technical execution in balance.

Technology Office

Iot and Robotics Mentor

Offers guidance rooted in past builds, competitions, and integration projects to help the Lead plan ahead. Available as a resource when AWS IoT services, device connectivity, or automation projects need an experienced eye, supporting innovation across cloud and edge applications alike.

Technology Office

Project Management Mentor

Brings seasoned perspective on project planning, team coordination, and delivery to support the Lead's development. Helps the Lead work through workshop design on agile methodologies and collaboration tools, sharing what has worked in keeping teams accountable and projects on course. Serves as a reliable guide when the Lead faces the challenges of balancing structure with the dynamic, fast-moving nature of a student organization.

Technology Office

Software Engineering Mentor

Helps the Lead think through coding challenges, mentorship structures, and project design using lessons picked up from prior cycles. Serves as a go-to for questions on AWS developer tools and cloud-native frameworks, nudging the team toward efficient, modern workflows.

Technology Office

UI / UX Mentor

Acts as a resource for the Lead when planning workshops on design tools like Figma and Flutter. Brings a refined perspective on user interface design, user experience strategy, and accessibility standards, helping shape programs that are both engaging and practical.
